PRODUCT DESCRIPTION

The DestroyIt 2230 CC cross cut shredder features electronic photo cell sensors that automatically start and stop the cutting head once paper has been inserted. This feature enables one handed shredding operation, making it a great machine for individualized use. The 2230 CC paper shredder shreds up to 4 sheets of paper at a time and destroys paper clips and staples with ease. Its three position rocker switch stand by stop reverse allows the use to efficiently maneuver between functions in less time. The reverse function quickly releases paper jams and misfeeds. The pearl gray waste bin is self contained and eliminates the need for extra bags.
