PRODUCT DESCRIPTION

The Oztec 1675 EC is a heavy duty, strip cut shredder featuring enclosed high capacity cabinet. The large cabinet holds more shredded paper than other Oztec models within its class. The doors swing open in the front to provide easy access to the bag. The included bag frame uses extra large shred bags for longer shred cycles, making bag changes infrequent. Its continuous duty rated motor is designed for large office volume shredding. Features include a lock and key system that prevents unauthorized use. An operational re set switch, Quick Stop button and a visual indicator light keep the user informed on shredding operations. The No oiling design means there is no end user maintenance. Optional computer paper shelf can be purchased at an additional cost.
